

SHINTA PERMATA SARI

Software Engineer

Jakarta, Indonesia | <https://wa.me/6287880939199> | shintaps97@gmail.com | <https://www.linkedin.com/in/shintaps09>

CAREER OVERVIEW

Software Engineer with over 7 years of experience in middleware development, API integration, and system architecture, across the telecommunications, banking, and oil & gas industries. Hands-on with Java Spring Boot, TIBCO, webMethods (Software AG), WSO2, and GCP microservices, and comfortable designing scalable RESTful APIs and managing third-party integrations from development through to production deployment.

TOOLS & TECHNICAL SKILLS

Middleware & Integration: TIBCO BW, TIBCO BWCE, webMethods (Software AG), WSO2 Enterprise Integrator, APIGEE, Mashery API Management, Azure API Management

Languages & Frameworks: Java, Spring Boot / Spring Framework, Golang, RESTful API

Cloud & Infrastructure: Google Cloud Platform (GCP), GKE Anthos, Docker, Jenkins, Microsoft Intune, Azure

Messaging & Databases: Solace, JMS (Java Message Service), Oracle, SQL Server, PostgreSQL

Testing & Tools: Postman, Swagger, Unit Testing, Git, SVN, GitLab

Methodologies & PM Tools: Agile, Kanban, JIRA, Miro

WORK EXPERIENCES

Custom Software Engineer Sr Analyst - CAPGC Aster IT Operations, PT. Accenture

January 2025 – July 2026

- **Completed support** for non-SAP IT applications and middleware within the CAPGC Aster IT Operations scope, covering development, monitoring, and production support.
- **Completed development and maintenance of APIs on Apigee** consumed by Salesforce and forwarded to ProWatch, including bug fixes and technical design documentation for a migration initiative to SAP CPI.
- **Completed automated packaging and deployment** of non-SAP desktop applications (*Caesar*, *PV Elite*, *Intrucalc*, *Aspen One Engineering*, *PI Suite*) via Microsoft Intune, enabling self-service installation and resolving post-deployment issues for end users.
- **Completed migration of non-SAP applications** (PI AVEVA, Seeq, MDPro, RomeoMBM, Sphera, Aspen) from Shell to Aster with zero disruption to users, including ongoing monitoring and support across oil & gas operations.
- **Completed management of license renewals** and version upgrades to keep non-SAP applications compliant, secure, and performing optimally.

Senior Software Engineer, PT. Tech Mahindra Indonesia

July 2023 - January 2025

Delivered API development, middleware integration, system migration, and production support for enterprise clients in the banking and telecommunications industries.

Client Assignment: Bank Danamon Indonesia (July 2023 - July 2024)

- **Developed and maintained** integration services on Software AG webMethods as part of the IT Middleware team
- **Built a new API** to transmit Bancas Manulife SPAJ (insurance application) data from channel to API Gateway, supporting the solution through production deployment
- **Developed and enhanced internal banking APIs** for customer inquiry and debit card services, integrating with core banking systems
- **Contributed** to the MPN G3 tax payment enhancement.

Client Assignment: Indosat Ooredoo Hutchison - IOH (July 2024 - January 2025)

- **Supported PRM-RMS API migration**, including third-party integration with Blue Marble, as part of the VAS 1 team
- **Maintained middleware on TIBCO BusinessWorks** and provided end-to-end support from testing through production deployment.

Middleware Developer, PT. XL Axiata Tbk

January 2019 - July 2023 (Under PT Indocyber Global Teknologi, Jan 2019 - Jul 2021; Axiata Digital Labs, Jul 2021 – July 2023)

Member of the API & Microservices team within the IT division, contributing across multiple scrum teams on telecommunications projects for XL Axiata.

Multipayment in myXL Apps

- **Developed an API to create virtual account payments for any Indonesian bank**, integrating with third-party payment gateway Xendit, deployed as Java microservices on GCP through to production.
- **Developed APIs for GoPay payment integration**, including account linking/unlinking and balance inquiry, enabling seamless payment transactions for myXL customers.

Hybrid Postpaid

- **Developed APIs supporting prepaid-to-postpaid migration**, implemented across multiple digital sales channels including Web Sales Agent and the myXL app.

Postpaid

- **Developed APIs supporting quota inquiry services** for customer-facing digital channels using Java microservices on GCP.
- **Contributed to development and enhancement of APIs** for postpaid purchase, payment, reload, and subscriber-related services, **improving reliability across core postpaid workflows**.

Hygiene

- **Improved service performance** and resolved bugs across existing telecom services, **strengthening quota and subscriber management stability**.
- **Supported development** on TIBCO BusinessWorks for legacy services.

AXIS

- **Developed and enhanced Starter Pack (SP)** benefit and bonus capabilities, **enabling faster rollout of new package requests from the business team**.

EDUCATION

Asia e University | 2014 - 2018

Bachelor of Information Communication and Technology (Hons), Specialization in Information Systems

State Polytechnic of Jakarta | 2014 - 2018

Bachelor of Information Communication and Technology (Hons), Specialization in Information Systems, in collaboration with Asia e University, Malaysia

LICENSES & CERTIFICATIONS

- TCA - TIBCO BusinessWorks - Issued June 2021 | [Show credential](#)
- TCA - TIBCO BPM Enterprise - Issued June 2021 | [Show credential](#)
- Reinvention with Agentic AI - Issued February 2026 | [Show credential](#)
- Certificate of Completion: Claude 101, Anthropic - Issued April 2026 | [Show credential](#)
- Certificate of Completion: AI Fluency Framework, Anthropic - Issued April 2026 | [Show credential](#)
